

# AmicaBet

# Betting Social Network

AmicaBet, constructed using Flask, is a betting social network that grants users the freedom to wager on a wide range of subjects. Consequently, individuals have the opportunity to fashion personalized bets and extend invitations to friends, encouraging them to partake in the challenges. With AmicaBet, users can readily devise custom bets and engage in exciting interactions.

# How it works

## Q1 – Pick the bet.

Bet on anything—  
football match,  
election, the  
weather, or  
whatever you can  
think of.

## Q2 – Pick your friend.

Connect with friends  
who enjoy having a bet

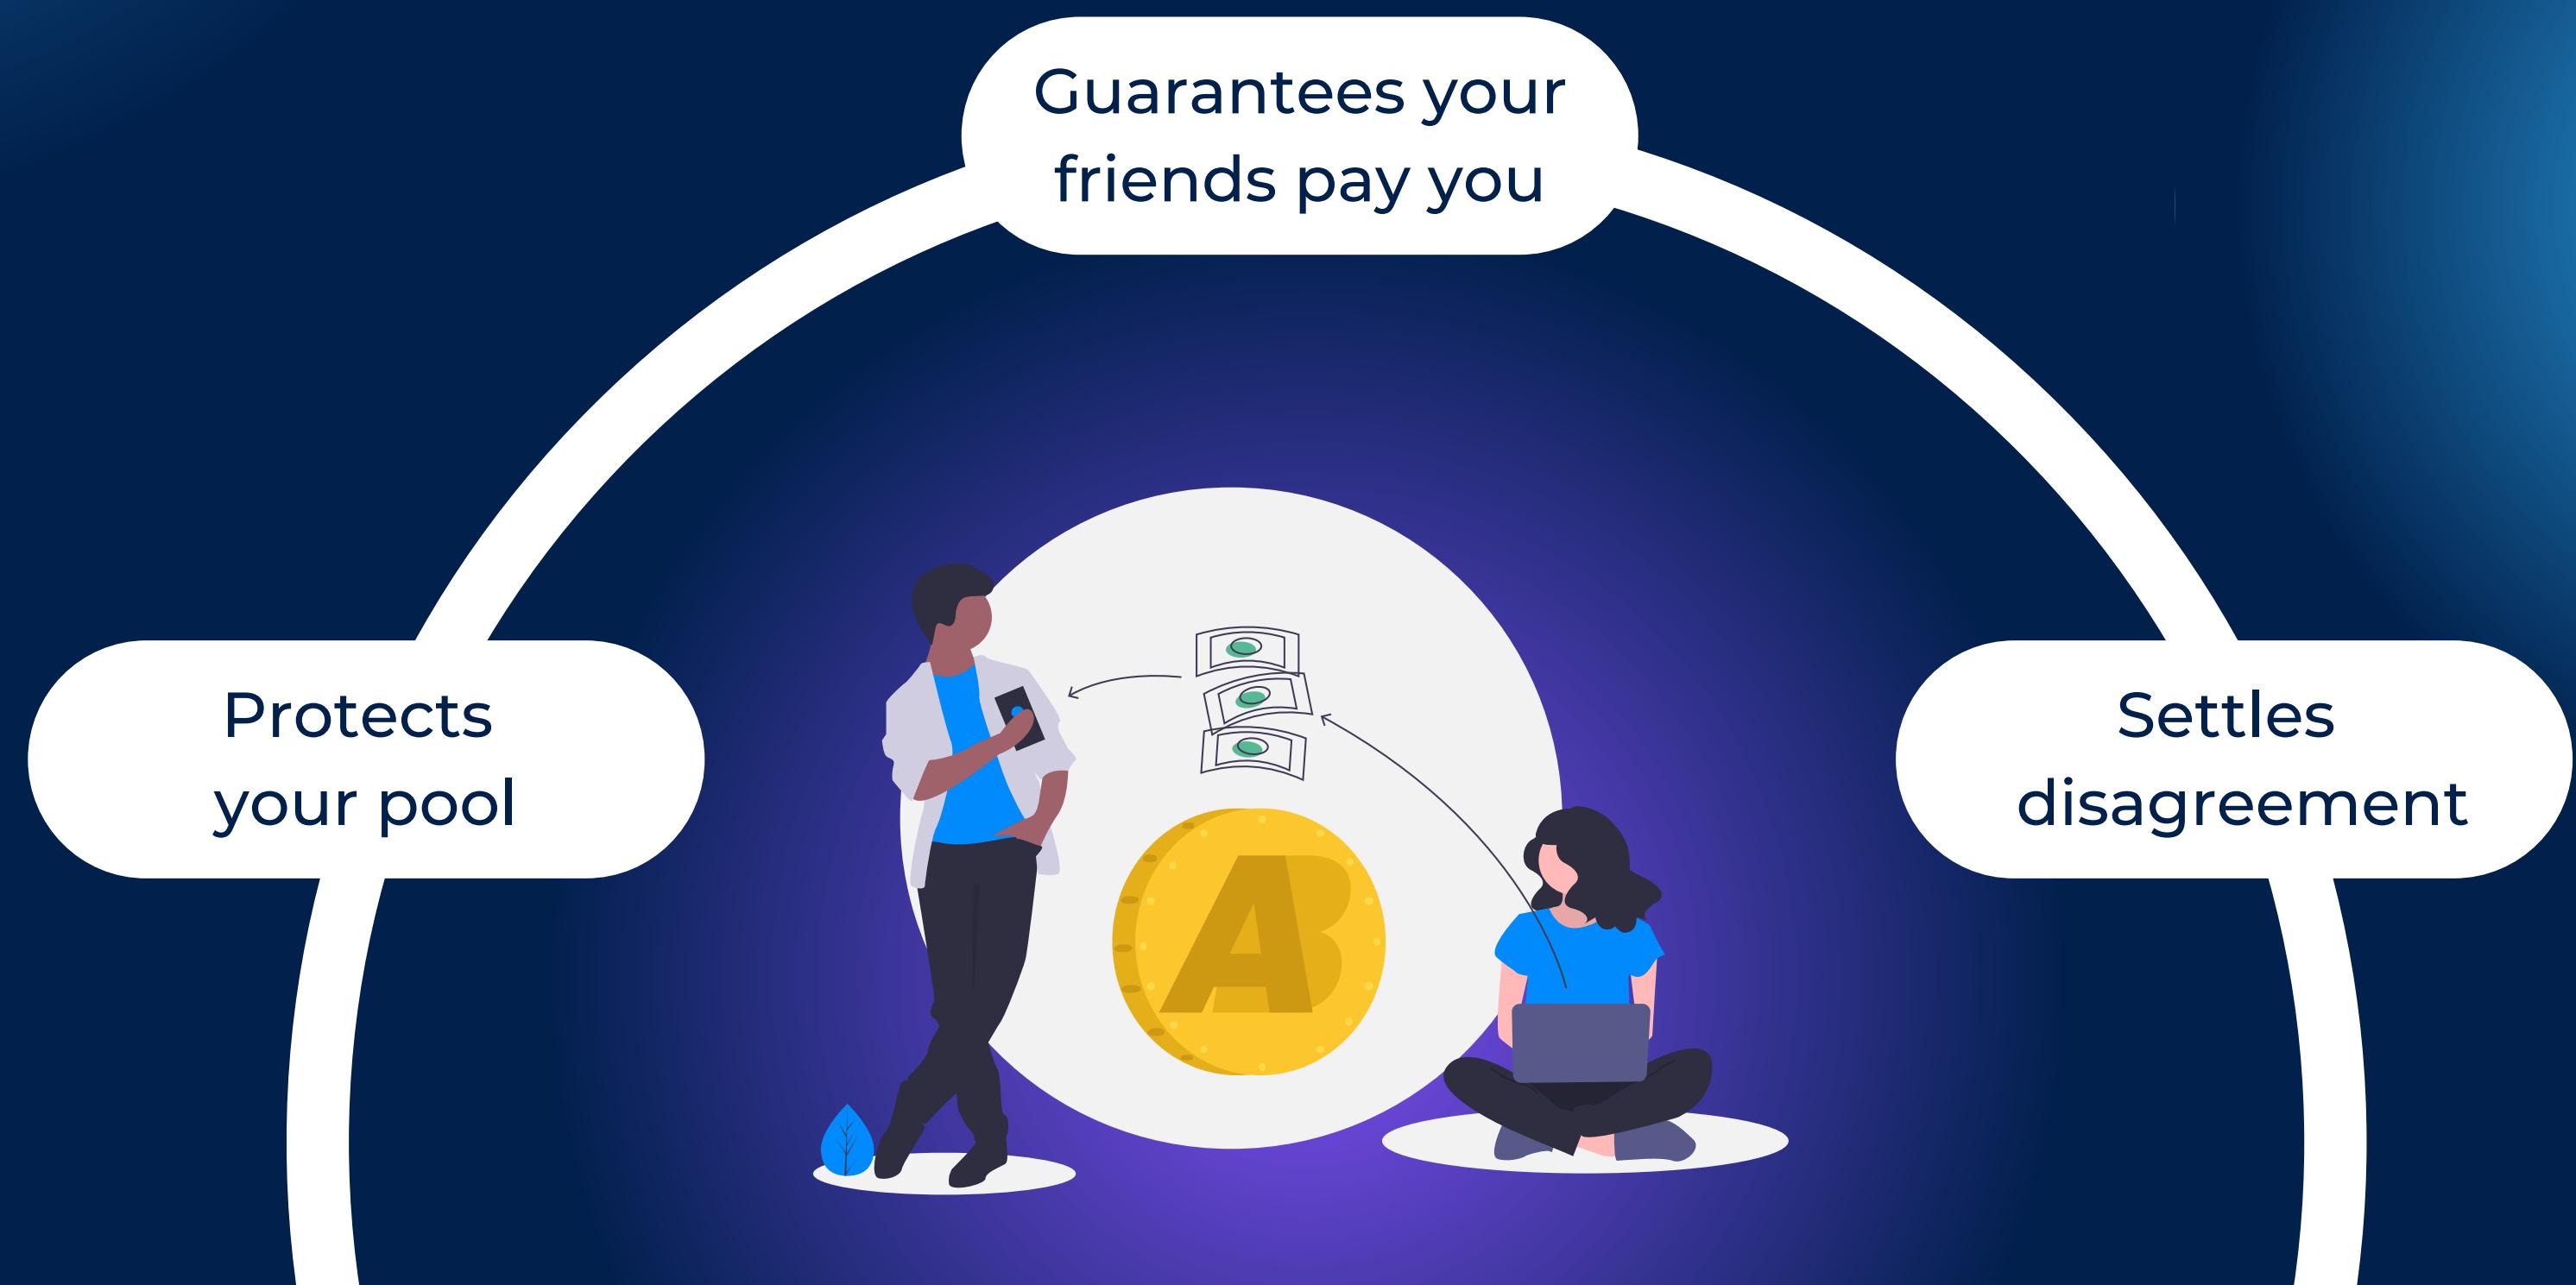

## Q3 – Pick the wager.

How much are you  
both going to put  
on the line?

# What is a Custom Bet?

- A Custom Bet is a bet that you describe and create. What does that mean?
- Well, AmicaBet lets you bet on anything. It doesn't matter if it's your golf game over the weekend or who can run a faster mile. Basically, any bet that you create is a Custom Bet.
- Custom bets are settled through mutual agreement between the opponents, both sides must agree to the outcome or a small percentage is detracted from the pool.

# AmicaBet's Features vs Traditional Betting

# Technical Showcase
